**CE 332**

**WATER RESOURCES ENGINEERING**

---

**SYLLABUS/SPRING 2016**

## Course Information

<b>Required or Elective</b>	<input checked="" type="checkbox"/> Required <input type="checkbox"/> Elective	<b>Date Prepared</b>	January 2016
<b>Semester</b>	Spring 2016	<b>Class Hours, Lab. Hours and Classrooms</b>	Class Hours: Fridays 14:00-16:50, Rm. G010
<b>Course Credit Hours/ ECTS credits</b>	(3+0+0) 3 / 6	<b>Pre-requisite/ Co-requisite</b>	CE 331
<b>Level of Course</b>	Junior	<b>Language of Instruction</b>	<input checked="" type="checkbox"/> English <input type="checkbox"/> Turkish
<b>Instructor(s) and office hours</b>	Assist. Prof. Dr. Melih Çalamak (melih.calamak@tedu.edu.tr) (Rm. G224) (Office hours: Mondays 14:00-18:00 or by appointment)		
<b>Teaching Assistant(s)</b>	-		
<b>Textbook(s)</b>	1. Usul, N. (2013). <i>Engineering Hydrology</i> . 3 <sup>rd</sup> Edition, METU Press, Ankara. 2. Yanmaz, A.M. (2013). <i>Applied Water Resources Engineering</i> . 4 <sup>th</sup> Edition, METU Press, Ankara.		
<b>Recommended Readings</b>	1. Chow, V.T., Maidment, D.R. and Mays, L.W., (1988). <i>Applied Hydrology</i> . McGraw Hill. 2. Bedient, P.B., Huber, W.C. and Baxter E.V. (2013). <i>Hydrology and Floodplain Analysis</i> . Prentice Hall. 3. Linsley, R.K., Kohler, M. A. and Paulhus, J.Lh. (1988). <i>Hydrology for Engineers</i> , McGraw Hill. 4. Shaw, E.M. (1991). <i>Hydrology in Practice</i> , Chapman and Hall. 5. Mays, L. W. (2010). <i>Water resources engineering</i> . John Wiley & Sons. 6. Wurbs, R. A., & James, W. P. (2001). <i>Water resources engineering</i> . Prentice Hall. 7. Linsley, R.K., Franzini, J., Freyberg, D. and Tchobanoglous, G. (1992). <i>Water Resources Engineering</i> . McGraw Hill. 8. Jansen, R.B. (1988). <i>Advanced Dam Engineering</i> . New York. 9. Robertson, J. A., Cassidy, J. J. and Chaudry, M. H. (1988). <i>Hydraulic Engineering</i> , Houghton Miffling Comp. 10. Tworth, A.J., Law, F.M., Crowley, F.W. and Ratnayaka; D.D. (1994). <i>Water Supply</i> , Edward Arnold. 11. USBR, (1987). <i>Design of Small Dams</i> , Water Resources Publications. 12. Mc Ghee, T. J. (1991). <i>Water Supply and Sewerage</i> , Singapore, McGraw Hill. 13. Hansen, V.E., Israelsen, O.W. and Stringham, G.E., (1980). <i>Irrigation Principles and Practices</i> . John New York, Wiley and Sons.

---

## Course Description

---

Introduction to hydrology and water resources engineering. Basin and hydrologic processes: precipitation, stream flow, infiltration. Hydrograph analysis. Hydrologic flood routing. Groundwater hydrology. Dams and spillways. Municipal water supply systems. Wastewater and storm water collection and discharge. Irrigation and drainage.

---

## Course Objective

---

The aim of this course is to serve an introduction to field of engineering hydrology by covering fundamentals such as hydrological cycle, catchment, losses, hydrographs and hyetographs; give basic concepts of water resources engineering; enable students to use basic information in design applications of hydraulic engineering.

---

## Course Learning Outcomes

---

Upon successful completion of this course, a student specifically will be able to:

1. Recognize the elements of the hydrological cycle and able to define the movement of water on earth [B01].
2. Explain the measurement of precipitation and analyze the precipitation data [B03].
3. Examine rainfall intensities and hyetographs [B04].
4. Understand the components of runoff and analyze hydrographs [B04].
5. Determine the storage variations in a reservoir during a flood [B04].
6. Explain the types of dams and their construction principles [B02].
7. Design and analyze the stability of concrete gravity and arch dams [B05].
8. Investigate the hydraulics of overflow spillways [B04].
9. Conceptualize processes in simple groundwater systems and determine groundwater flow through use of Darcy's law [B04].
10. Design gravity pipelines used for water supply purposes [B05].
11. Design wastewater and storm water systems [B05].
12. Determine the dimensions of irrigation canals [B05].

---

## Course Assignments

---

- A. **Midterm Exams (60%):** There will be three midterm exams each having equal weight. The dates of the exams will be announced later.
- B. **Final Exam (40%):** There will be a cumulative final exam. The date of the final exam will be announced later.

---

## Course Assessments & Learning Outcomes Matrix

---

Assessment Methods	Course Learning Outcomes
Midterm Exam I	#1, #2, #3, #4,
Midterm Exam II	#5, #6, #7, #8
Midterm Exam III	#9, #10
Final Exam	all

---

## Relationship to Program Outcomes

---

This course contributes to fulfillment of the following program outcomes:

Comprehend science and advanced mathematics subjects fundamental to Engineering. [PO1]

Apply knowledge of mathematics, science, and engineering to design and implement original, innovative and sustainable civil engineering systems or processes to meet desired needs within a greater societal context [PO2].

Identify, formulate, and solve engineering problems [PO6].

Employ state-of-the-art engineering techniques and computing tools necessary for creative engineering solutions [PO11].

---

## Course Outline

---

Week	Topic
1	<b>1. INTRODUCTION (3 hrs.)</b> 1.1. Scope of the course 1.2. Hydrologic cycle 1.3. System concept
2-3	<b>2. HYDROLOGIC PROCESSES (6 hrs.)</b> 2.1. Basin 2.2. Precipitation 2.3. Stream flow 2.4. Infiltration
4-5	<b>3. HYDROGRAPH ANALYSIS (6 hrs.)</b> 3.1. Components of runoff 3.2. Hydrograph characteristics 3.3. Unit hydrograph theory 3.4. Synthetic unit hydrograph  <b>MIDTERM EXAM I (7-11 March 2016)</b>

6	<p><b>4. RESERVOIR ROUTING (2 hrs.)</b></p> <p>4.1. Introductory remarks 4.2. Routing in reservoirs</p>
6-7-8-9-10	<p><b>5. DAMS AND SPILLWAYS (12 hrs.)</b></p> <p>5.1. Classification and parts of dams 5.2. Reservoir capacity determination 5.3. Dam construction principles 5.4. Concrete gravity dams 5.5. Arch dams 5.6. Spillway design flow 5.7. Hydraulics of overflow spillways 5.8. Crest gates and spillway profile 5.9. Energy dissipation facilities</p> <p style="text-align: center;"><b>MIDTERM EXAM II (4-8 April 2016)</b></p>
10-11	<p><b>6. GROUNDWATER HYDROLOGY (4 hrs.)</b></p> <p>6.1. Fundamentals of groundwater flow 6.2. Groundwater flow equations 6.3. Well hydraulics</p>
12	<p><b>7. WATER SUPPLY (3 hrs.)</b></p> <p>7.1. Municipal water requirements and population estimation 7.2. Characteristics of municipal water supply systems 7.3. Hydraulics and operation of gravity pipelines 7.4. Design of gravity transmission lines</p> <p style="text-align: center;"><b>MIDTERM EXAM III (25-29 April 2016)</b></p>
13	<p><b>8. WASTE WATER COLLECTION AND REMOVAL (3 hrs.)</b></p> <p>8.1. Flow in sewers 8.2. Design of storm sewer systems 8.3. Design of sanitary sewer systems</p>
14	<p><b>9. IRRIGATION AND DRAINAGE (3 hrs.)</b></p> <p>9.1. Introduction, land classification 9.2. Characteristics of irrigation systems 9.3. Design of classical irrigation systems by Demand Method 9.4. Land drainage facilities</p>

---

## Course Policies and Some Remarks

---

### *General*

1. The course schedule is tentative and it will be adapted to the pace of the class.
2. There will be three midterm exams. Midterm weeks are given in the tentative schedule and they are subject to change.

3. Date for the final exam will be announced at the end of the semester. The final exam will cover all topics.
4. Cell phones should be turned off and kept out of sight during the classes. You are not also allowed to use your computers/ tablets etc. at the classroom.
5. If you are late for more than 10 minutes, please do not enter the class.
6. You are not allowed to use cell phones during the exams.

### *Attendance*

In order to be admitted to the final examination, a student **must have attended at least 70% of the lectures**. Furthermore, students **must have obtained an average of at least 30 % from the three midterm examinations** given. Students not fulfilling these conditions will not be permitted to enter the final examination. Students not given the permission to take the final examination will automatically receive the grade **FX** at the end of the semester.

### *Make Up Exams*

Make-ups for midterm exams will NOT be offered generally. If you have a legitimate reason for missing an exam, then you must arrange to make up the exam BEFORE the scheduled time of the exam. The only exceptions are illness or emergency (e.g., death in family, a traffic accident, etc.). In case of an illness or emergency you need to supply a documentation that supports your claim. Also please read the document given in the link: <http://www.tedu.edu.tr/tr/main/yonetmelikler-veyonergeler>

### *Late Assignment Submission*

For each day after the announced deadline, 20% of the total earned mark will be deducted. More than two days of late submissions will not be accepted.

### *Calculator Policy*

You may use a scientific calculator during the exams. Programming the calculator before or during the exams are not allowed.

### *Plagiarism*

All of the following are considered plagiarism:

- “Turning in someone else’s work as your own
- Copying words or ideas from someone else without giving credit
- Failing to put a quotation in quotation marks
- Giving incorrect information about the source of a quotation
- Changing words but copying the sentence structure of a source without giving credit
- Copying so many words or ideas from a source that it makes up the majority of your work, whether you give credit or not” (www.plagiarism.org)

Plagiarism is a very serious offense and will be penalized accordingly by the university disciplinary committee. The best way to avoid accidentally plagiarizing is to work on your own before you ask

for the help of other resources. Collaboration on non-collected homework and in studying is strongly encouraged; however, the work you hand in must be solely your own. For more information on TEDU policy on intellectual integrity see the link: [http://student.tedu.edu.tr/sites/default/files/content\\_files/2015-2016ogrencielkitabi.pdf](http://student.tedu.edu.tr/sites/default/files/content_files/2015-2016ogrencielkitabi.pdf)

### *Cheating*

Cheating has a very broad description which can be summarized as “acting dishonestly”. Some of the things that can be considered as cheating are the following: copying answers on exams, homework and lab works, using prohibited material on exams, lying to gain any type of advantage in class, providing false, modified or forged data in a report, plagiarizing, modifying graded material to be re-graded, causing harm to colleagues by distributing false information about an exam, homework or lab. Cheating is a very serious offense and will be penalized accordingly by the university disciplinary committee. For more information on TEDU policy on intellectual integrity, please see the following link: [http://student.tedu.edu.tr/sites/default/files/content\\_files/2015-2016ogrencielkitabi.pdf](http://student.tedu.edu.tr/sites/default/files/content_files/2015-2016ogrencielkitabi.pdf)

### *Disability Support*

If you have a disabling condition which may interfere with your ability to successfully complete this module, please contact Dr. Tolga İnan (email: [tolga.inan@tedu.edu.tr](mailto:tolga.inan@tedu.edu.tr)). For more information please see Handbook for Registered Students.
