Assistant Professor

- BA 203 Financial Accounting (2017-2018 Spring) , TED University, ANKARA
- BA 402 Graduation Paper and Seminar (2017-2018 Spring) , TED University, ANKARA
- BA 401 Research Methods (2016-2017 Summer, 2017-2018 Fall, 2017-2018 Spring), TED University, ANKARA
- EM 590 Graduation Project (2017-2018 Fall) , TED University, ANKARA
- BA 503 Financial and Managerial Accounting (2017-2018 Fall) , TED University, ANKARA
- BA 524 Investment and Feasibility Analysis (2016-2017 Spring) , TED University, ANKARA

Instructor

- BA 503 Financial and Managerial Accounting (2016-2017 Fall) , TED University, ANKARA
- MAN 422 International Finance (2012-2013 Spring), Bilkent University, ANKARA
- MAN 321 Corporate Finance (Lab Instructor) (2013 Summer, 2013-2014 Fall, 2014-2015 Spring) , Bilkent University, ANKARA

Teaching Assistant

- MAN 321 Corporate Finance (2012-2013 Fall) , Bilkent University, ANKARA
- MAN 421 Capital Markets and Institutions (2014-2015 Spring) , Bilkent University, ANKARA
- MAN 307 Financial Management (2014-2015 Spring), Bilkent University, ANKARA

PhD. THESIS STUDY

- “Mergers and Acquisitions During Financial Crises”, Thesis Advisor: Basak Tanyeri (Bilkent University)

The thesis study investigates the effects of financial crises on mergers and acquisitions (M&A) activity. We investigate if M&A deals in crisis periods differ in terms of dollar volume and quantity of deals, target and bidder characteristics, cumulative abnormal returns (CAR) and deal premiums. We identify effects of financial crises based on a sample of 39 countries over the period from 1992 to 2011. We conclude that financial crisis in target country affects the value generated in M&A deals and how the generated value is distributed between target and bidder shareholders. Moreover, financial crises affect the value generated and the distribution of value differently in developed and emerging market countries.

MBA THESIS STUDY

- “An Analysis of Stock Splits in the İstanbul Stock Exchange”, Thesis Advisor: Seza Danışoğlu (Middle East Technical University)

The study tests the validity of the trading range hypothesis as a basis for stock split decisions of Turkish companies over the period from 1992 to 2002. We investigate whether or not Turkish firms whose share prices rise above their optimal trading ranges are more likely to split their stock compared to firms whose share prices are at or below their optimal trading ranges. Our findings do not support trading range hypothesis since the estimation of the logit model, which determines the probability of firms to split, does not reveal any statistically significant result.
